The key strengths of computers are - Speed

- ► Speed
- ► Storage
- ▶ Do not get bored
- ► All of the given choices

Question No: 17 (Marks: 1) - Please choose one

Compared to vacuum tubes, Transistors offer: All of the given choices

- ► Much smaller size
- ▶ Better reliability
- ► Much lower cost
- ► All of the given choices

Question No: 18 (Marks: 1) - Please choose one

Which of the following is NOT a component of IC? Resistors

- ► Transistors
- ▶ Diodes
- Resistors
- ► Vacuum tubes

Question No: 19 (Marks: 1) - Please choose one When we use <INPUT type="password">, what will happen? - Text will be in **** format

www.virtualinspire.com

► Text will not be visible

► Text will be in normal format
► Text will be in **** format
► Text will be in #### format
Question No: 20 (Marks: 1) - Please choose one Spread sheet is a type of _ Mathematical software ▶ Productivity software ▶ Engineering software ▶ Mathematical software ▶ Business software
Question No: 21 (Marks: 1) - Please choose one Word Processor is a Application Software System Software Application Software Device Utility WWWWWITTUALING
Question No: 22 (Marks: 1) - Please choose one _ Utility Program refers to the firmware code which is run by an IBM compatible PC when first powered on. ▶ DOS ▶ BIOS ▶ Utility Program ▶ None of these
Question No: 23 (Marks: 1) - Please choose one A computer program that facilitates the communication between the computer and a peripheral device is called Language Translator
► Operating system
www.virtualinspire.com

 Utilities Language Translator Device Drives
Question No: 24 (Marks: 1) - Please choose one In JavaScript, what will be the result of the following operation 79%3 10 11 22 3
Question No: 25 (Marks: 1) - Please choose one Which of the following number system is used by microprocessor? Binary
 ▶ Binary ▶ Decimal ▶ Octal ▶ Hexadecimal Web site is collection of related Information ▶ Web pages ▶ Information ▶ Search Engines ▶ None of the given choices

Question No: 12 (Marks: 12

Question No: 1 (Marks: 2) - Please choose one

Which statement is wrong for naming an identifier?

Identifiers are names used by JavaScript to refer to variables, objects, properties, methods, and functions.

An identifier must begin with an alphabetical character (a-z or A-Z), underscore "" character or \$ character.

Subsequent characters can be an alphabetical (a-z or A-B) or numeric character (0-9) or an underscore

Question No: 2 (Marks: 2) - Please choose one

Which of the following words can't be used for naming an identifier in JavaScript?

struct

plugin

parent

package

Question No: 3 (Marks: 2) - Please choose one

Data Management comes up with different issues except one:

Data entry

Data updates

Data integrity

Data security

Data presentation

Question No: 4 (Marks: 2) - Please choose one

Choose correct statement. The value of a variable can not be changed during execution of the script. In JavaScript a variable's type is defined before usage. The untyped feature makes JavaScript simpler to program in when developing short programs. The untyped feature makes JavaScript simpler to program in when developing big programs. Question No: 31 (Marks: 1)

When does recursion occur?

Question No: 32 (Marks: 1)

What are the types of computer network according to the distance between nodes ?

Answer:

There are two types of networks.

- 1. LAN (Local Area Network)
- 2. WAN (Wide Area Network)

Question No: 33 (Marks: 2)

What is meant by semantic error?

THE BEST

LEADERS TEAMS, ORGANISATIONS

Answer:

Occur when a statement executes and has an effect not intended by the programmer and Often times occur only in unusual & infrequent circumstances

Question No: 34 (Marks: 2)

List down the names of two array methods available in JavaScript.

Answer:

- 1. sort() [sorts elements in alphabetical order]
- 2. reverse() [Reverses the order of elements]

Question No: 35 (Marks: 3)

How can you define a consistent web design? Why is it needed?

Answer:

A consistent good designed website is generated for general public that allows users to

attain what they want as quickly as possible without spending much effort.

A consistent good design assists the user in recovering from errors.

Question No: 36 (Marks: 3)

How can we include images in a web page using HTML and Java script?

Answer:

Image in HTML

Image in Javascript

Images in JavaScript can be manipulated in many ways using the built-in object Image.

www.virtualinspire.com

Additional properties to HTML are hspace, vspace & lowsrc.

Example: It can be used by many handlers like, on Abort, on Load & on Error

Question No: 37 (Marks: 3)

The event handler attribute consists of three parts. Write about each of them.

Answer:

The identifier of the event handler

The equal sign

A string statement enclosed in double or single quotes.

PAPER 8888

Question No: 38 (Marks: 5)

What is a packet in the network environment? What kind of information does it contain?

Answer:

- Packet is data chopped up into pieces in a network environment.
- These packets contain information about which computer sent the data and where the data is going.

• If a packet runs into a problem during its trip, it can attempt to find	another route.
When all the packets get where they are going, the recipient computer puts	them together
again.	
Question No: 40 (Marks: 10)	
	Write down
HTML and JavaScript code for the following requirements:	
Declare an Array with the identifier SUBJECT having length 5. Assign follows:	lowing values to
the array elements:	
MIS, Java, Algorithms, Databases, C++	
Show all values in reverse order.	
Question No: 41 (Marks: 10)	
	How instant
messaging works? Write the steps involved in this process.	

Answer:

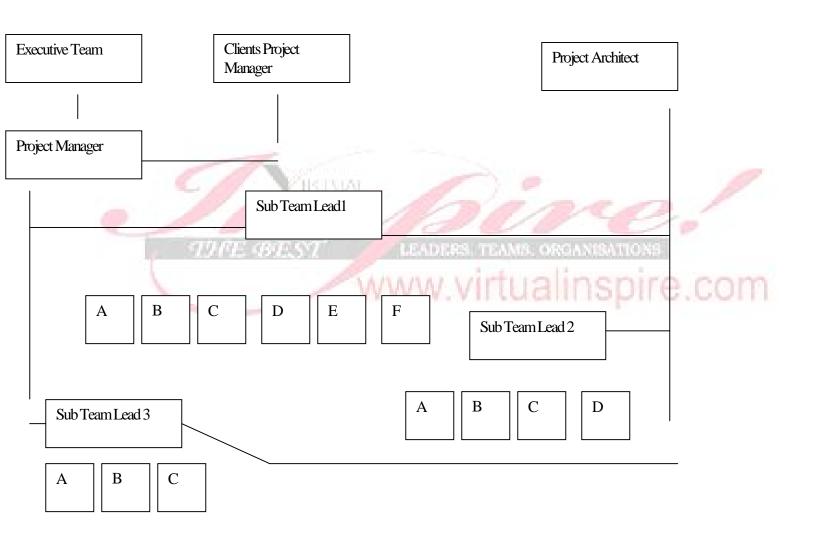

The Instant Messaging services available allow us to maintain a list of people (contacts) that we interact with regularly. We can send instant messages to any of the contacts in our list as long as that contact is online.

Following steps are involved in IM working.

- 1. User commences the IM client.
- 2. IM client finds the IM server & logs in.

Answer:

Please ignore small lines relating Sub Teams to subordinates due to shortage of time. ABCD etc are connected directly to Team Lead 1,2 & 3 accordingly.

Question No: 1 (Marks: 2) - Please choose one

Which statement is wrong for naming an identifier?

Identifiers are names used by JavaScript to refer to variables, objects, properties, methods, and functions.

An, identifier must begin with an alphabetical character (a-z or A-Z), underscore character or \$ character.

Subsequent characters can be an alphabetical (a-z or A-B) or numeric character (0-9) or an underscore

Ouestion No: 2 (.Marks: 2) - Please choose one Which of the following words can't be used for naming an identifier in JavaScript? struct plugin parent package

Question No. 1

Micro controller

- 1 Are faster then microprocessor

Question No. 5

What do you know about WWW and what are the basic elements of web design?

Question No. 6

What do you know about Neural Networks and give any two examples.

Question No. 7

Define and explain Greedy Algorithm briefly. You are also required to give key advantage and

an example of Greedy Algorithm.

Question No. 8

Determine the correct reserved words of JavaScript from the following list and explain them

briefly.

```
1
     document
2
     read
3
     alert
4
     delete
5
     function
6
      comment
Ouestion No. 9
Discuss any three issues/characteristics of Data Management.
Question No. 10
Write function using JavaScript. The name of function will be
"display()". The "display()"
function will display the following string as shown below:
X3 + Y2
[Hint: Use string methods sub() and sup()]
The "display()" function should be called at onLoad event.
Question No. 11
Consider the following code Windualinspire com
pitch = "hard"
bowler="slow"
if ( (pitch = "hard") \parallel (bowler = "fast") )
myStatus = "Bouncer";
else
myStatus = "Short Pitch";
Variable myStatus will contain the value:
1
     Bouncer
2
      Short Pitch
3
     Hard
4
      Slow
Question No. 12
What does the following JavaScript code
function changeBgcolor()
```

```
oldColor = window.document.bgColor;
window.document.bgColor = "pink";
window. alert("The old color was " + oldColor);
1
      Change the Color of Window document to pink and nothing
else
      Change the Color of Window document to pink and display the
name of old Color in a
dialogue box
      Change the Color of Window document to Blue and displays
name of old color in a
dialogue box
      Create a form in window document
Question No. 13
Examine and explain the logic of following pseudo code:
Let the decimal number be an integer x, x > 0
Let the binary equivalent be an empty string y
Repeat while x > 0
Determine the quotient & remainder of x \div 2
y = CONCATENATE(remainder, y)
x = quotient
Print y
Stop
Ouestion No: 7
Which of the following cannot come between the <Body></Body>
tag
      <P>

Both user and builderNone of the given options
Question No: 25 (Marks: 1) - Please choose one Rule of thumb learned through trial and error is called ▶ Design ▶ Heuristic ▶ Plan ▶ Aim
Question No: 26 (Marks: 1) - Please choose one JavaScript Variables are ▶ Dynamically Typed ▶ Statically Typed ▶ Strong Typed ▶ None of the given options Question No: 27 (Marks: 1) - Please choose one Which of the following application is collections of cells?
 Word Excel PowerPoint Outlook Express
Question No: 28 (Marks: 1) - Please choose one The browser breaks down the URL into parts. > 2 > 3 > 4 > 5
Question No: 29 (Marks: 1) - Please choose one A named collection of properties (data, state) and methods (instruction, behavior) is called Array

► Function ▶ Variable ▶ Object Question No: 30 (Marks: 1) - Please choose one First computer network was ► NSFNET ► FIRSTNET ARPANET ORPHANET Question No: 31 (Marks: 1) What kind of information can be stored in a database? Question No: 32 (Marks: 1) What does NIC stand for? Question No: 33 (Marks: 2) What is Information Technology? Question No: 34 (Marks: 2) What is meant by universal access of internet services Question No: 35 (Marks: 3) Write JavaScript code to convert the number 236.2363611111556 into currency format and JavaScript statement to show output. Question No: 36 (Marks: 3) Briefly mention any three problems in old modes of presentation development (Marks: 3) Ouestion No: 37 What is the difference between Internet and Intranet? Intra net is the communication of computer with in office or one building and internet across the boundaries

```
( Marks: 5 )
Ouestion No: 38
Suppose we have a big project. Draw hierarchy of the people
involved in the project?
Project director
Assistanst director
Research and planning director
Monitoring and evalution officer
Procurement office
Accounts officer
Executive officer
Question No: 39
                    ( Marks: 5 )
Show output of the following code:
for (i=0; i<=10; i++)
document.write("The number is + i);
document.write("<br/>");
Question No: 40
                    ( Marks: 10 )
Write a note on the following (4+6)
     Two popular review methods
a.
     Two types of errors
b.
Question No: 41
                    ( Marks: 10 )
Define the following terms:
A) Heuristic
B) System
C) System architecture
D) Analysis of Algorithm
```

Ouestion No: 1 (Marks: 1) - Please choose one ----- was known as "mill" in Analytical engine. ► Memory Processor Monitor ► Mouse Ref: An arithmetical unit (the "mill") would be able to perform all four arithmetic operations, plus comparisons and optionally square roots. Initially it was conceived as a difference engine curved back upon itself, in a generally circular layout,[2] with the long store exiting off to one side. Question No: 2 (Marks: 1) - Please choose one First electronic computer was ► ABC ► UNVAC 1 ► Harvard Mark 1 ► IBM PC Question No: 3 (Marks: 1) - Please choose one What is NOT a key factor while designing a website? Usability ► User-friendly Consistency Complexity Ouestion No: 4 (Marks: 1) - Please choose one What happens if I start a new list without closing the original one? ► An error will be generated ► A nested list will be created ► Previous list will end and a new will start. ► Nothing will happen Question No: 5 (Marks: 1) - Please choose one

The most upper right pixel of the screen is of color. ➤ Any ➤ Red ➤ Green ➤ Blue
Question No: 6 (Marks: 1) - Please choose one A single pixel can acquire approximately color schemes. ▶ 1 million ▶ 2 million ▶ 10 million ▶ 16 million
Question No: 7 (Marks: 1) - Please choose one The idea of Neural Networks field is based upon Human nature Human brain Human culture Human actions
 Question No: 8 (Marks: 1) - Please choose one Which one of the following is an application for artificial intelligence? ▶ Robotic ▶ Web Agent ▶ Decision Support System ▶ All of the given options Question No: 9 (Marks: 1) - Please choose one Register is a kind ofmemory
 Fast Super fast Slow Very slow
Question No: 10 (Marks: 1) - Please choose one Which of the following is a true statement?
www.virtualinspire.com

► Flat-file storage is better than tabular storage.
► Tabular storage is better than flat-file storage.
► Flat-file storage is better than relational storage.
➤ None of the given options
Question No: 11 (Marks: 1) - Please choose one substring(n, m) returns a string containing characters copied from position n to ▶ m - 2 ▶ m - 1 ▶ m + 1 ▶ m
Question No: 12 (Marks: 1) - Please choose one
The is the old profession which is being eliminated
because of computing.
► Typist IKINIAL
► Bank manager
➤ Operational manager
SS TIFE BEST LEADERS, TEAMS, ORGANISATIONS
WWW virtualinspire com
Question No: 13 (Marks: 1) - Please choose one The system that manages relational database is called
The system that manages relational database, is called
<u> </u>
➤ None of the given options
► Database Management System
► Data Management System
► Relational Database Management System
Question No: 14 (Marks: 1) - Please choose one When web server is busy it gives the following message to the user:
Time out
➤ Waiting
► Server busy
➤ None of the given options

Question No: 15 (Marks: 1) - Please choose one The group of technologies concerned with the capturing, processing and transmission of information in the digital electronic form is called
 Telecom Engineering Computer Engineering Computer Science Information Technology
Question No: 16 (Marks: 1) - Please choose one team consists on the sharpest technical minds in the company.
 Architecture Business Development Configuration Management Developer
Question No: 17 (Marks: 1) - Please choose one TCP stands for Transfer Center protocol Transmission Control Protocol Transmission Center Protocol Telephone Center Protocol
Question No: 18 (Marks: 1) - Please choose one A collection of data organized in such a way that the computer can quickly search for a desired data item is known as: ▶ Retrieving ▶ Database ▶ Information ▶ DBMS
Question No: 19 (Marks: 1) - Please choose one Microsoft Word is a type of:

 System Software Freeware Software Shrink-Wrapped Software Custom-built Software
Question No: 20 (Marks: 1) - Please choose one Users, how things work. ➤ Analyze in detail ➤ Muddle through ➤ Figure out ➤ Read in detail
 Question No: 21 (Marks: 1) - Please choose one Popular schemes used for reducing bytes for storage are: ▶ RGB and Color mapping ▶ RGB and Dithering ▶ RGB, Color mapping and Dithering ▶ Color mapping and Dithering
Question No: 22 (Marks: 1) - Please choose one Hardware malfunctions is related to Data updates Data integrity Data security Data accessibility
Question No: 23 (Marks: 1) - Please choose one If incorrectly we enter the negative age it is check by ► Limit Integrity ► Type Integrity ► Referential Integrity ► Physical Integrity
Question No: 24 (Marks: 1) - Please choose one Which is the user-friendly way of presenting data? ▶ Query

 Form Report All of the given options
Question No: 25 (Marks: 1) - Please choose one Currently the BlueRay DVD can store more than of data. ▶ 10 GB ▶ 100 GB ▶ 50 GB ▶ 150 GB
Question No: 26 (Marks: 1) - Please choose one In JavaScript, a \parallel b is interpreted as
 a is true or b is false a is true and b is true a is false and b is true a is true or b is true or both are true
Question No: 27 (Marks: 1) - Please choose one Speakers fall into the hardware category. True False
Question No: 28 (Marks: 1) - Please choose one onBlur event is occurred for a form element when it
 Gets focus Losts focus Some thing is typed in onBlur is not an event
Question No: 29 (Marks: 1) - Please choose one You can view a 3-D image on a > 3-D display

- ► 2-D display
- ► On both 2-D and 3-D displays
- ► We can not view a 3-D image

Question No: 30 (Marks: 1) - Please choose one Module level design and unit testing is the responsibility of

- ► Team Lead
- Developer
- ► Project Manager
- ► Quality Assurance Expert

Question No: 31 (Marks: 1) What is heuristic?

Common sense Lesson drawn from experience
(Artificial) Intelligent Systems
SW programs or SW/HW systems designed to perform complex tasks
employing strategies that mimic
some aspect of human thought

www.virtualinspire.com

or

- a commonsense rule (or set of rules) intended to increase the probability of solving some problem
- of or relating to or using a general formulation that serves to guide investigation

Question No: 32 (Marks: 1)

In programming, what is an object?

Object: A named collection of properties (data, state) & methods (instructions, behavior)

Question No: 33 (Marks: 2)

What is spreadsheet? List any two jobs that it can do.

A spreadsheet is a grid that organizes data into columns and rows. Spreadsheets make it easy to display

information, and people can insert formulas to work with the data. Electronic replacement for ledgers

Charts

financial-forecasting

Question No: 34 (Marks: 2)

In JavaScript, what is event handling? What are the two types of events?

Capturing events and responding to them

The system sends events to the program and the program responds to them as they arrive

Events can include things a user does - like clicking the mouse - or things that the system itself does -

like updating the clock.

Question No: 35 (Marks: 3)

Explain how many ways businesses monitor their employees?

- Systems are available that monitor almost every key stroke that an employee makes on a computer
- Systems are available that read and censor all incoming and outgoing eMail
- It is quite straight forward to monitor where you surf, and when Question No: 36 (Marks: 3)

What is difference between Design and System Architecture?

A system architecture or systems architecture is the conceptual design that defines the structure and/or behavior of a system.

An architecture description is a formal description of a system, organized in a way that supports reasoning about the structural properties of the system

Designs it as an independent, selfcontained system

Question No: 37 (Marks: 3)

What are the Sub categories of Artificial Intelligence? Briefly explain any two.

Expert systems

Systems that, in some limited sense, can replace an expert Robotics

Automatic machines that perform various tasks that were previously done by humans

Example: Pilot-less combat air planes Decision Support Systems: Interactive software designed to improve the decision-making capability of their users Utilize historical data, models to solve problems Question No: 1 (Marks: 1) - Please choose one
In Spreadsheets, you can create a relationship between two cells by using
Numbers
► Text
► Formulas None of given option
Question No: 2 (Marks: 1) Please choose one www.w.w.w.u.tualinspire.com
An algorithm that always takes the best immediate or local solution while finding an answer is called
Deterministic AlgorithmNon deterministic Algorithm
Greedy Algorithm
Randomized Algorithm

Question No. 6

What do you know about Neural Networks and give any two examples.

Question No. 7

Define and explain Greedy Algorithm briefly. You are also required to give key advantage and

an example of Greedy Algorithm.

Question No. 8

Determine the correct reserved words of JavaScript from the following list and explain them

```
briefly.
1
     document
2
     read
3
      alert
4
     delete
5
     function
6
     comment
Ouestion No. 9
Discuss any three issues/characteristics of Data Management.
Question No. 10
Write function using JavaScript. The name of function will be
"display()". The "display()"
function will display the following string as shown below:
X3 + Y2
[Hint: Use string methods sub() and sup()]
The "display()" function should be called at onLoad event.
Question No. 11
Consider the following code Windualinspire com
pitch = "hard"
bowler="slow"
if ( (pitch = "hard") \parallel (bowler = "fast") )
myStatus = "Bouncer";
else
myStatus = "Short Pitch";
Variable myStatus will contain the value:
1
     Bouncer
2
      Short Pitch
3
     Hard
4
      Slow
Question No. 12
What does the following JavaScript code
function changeBgcolor()
```

```
oldColor = window.document.bgColor;
window.document.bgColor = "pink";
window. alert("The old color was " + oldColor);
}

Change the Color of Window document to pink and nothing else

Change the Color of Window document to pink and display the name of old Color in a dialogue box

Change the Color of Window document to Blue and displays name of old color in a
```

4 Create a form in window document

dialogue box

Question No: 27 (Marks: 1)
What BIOS stands for? – Binary Input Output System

Question No: 28 (Marks: 1)

List down the Analytical Engine's components name (any two)

Answer: Google & Netscape,

Question No: 29 (Marks: 2)

Why uploading a web page is important? Describe in 2 - 3 lines.

Answer: By only uploading webpage we could place our information in order the other can reach up to ready what we load, upload means make available our data or information for the world web browsers

Question No: 30 (Marks: 3) What is the difference between microprocessors and microcontrollers? Give one example of both.

Answer: The microprocessor is electronic equipment which can perform several function and also processing of data and information present in a computer, while microcontroller can only perform one function for that its design

Example

Microprocessors _ Pentium 4

Microcontroller _ can be a switch in side the washing machine

Question No: 31 (Marks: 5)

Differentiate uni-Processor OS from Multi-Processor OS. Answer: The Multiprocessors is when more than one processor is under operation it can be several or may hundreds of the kind to perform one great operation or calculation, while our PC is a kind of uni-processor

Question No: 32 (Marks: 5)

PRIMA

Why do we call JavaScript an Object-based Language? Answer: Java Script is a language by which we are writing our web-pages, this language is designed to work for web pages

Question No: 33 (Marks: 2) What is meant by semantic error?

Answer:

Occur when a statement executes and has an effect not intended by the programmer and Often times occur only in unusual & infrequent circumstances

Question No: 34 (Marks: 2) List down the names of two array methods available in JavaScript.

Answer:

sort() [sorts elements in alphabetical order]
2. reverse() [Reverses the order of elements]

Question No: 35 (Marks: 3) How can you define a consistent web design? Why is it needed?

Answer:

A consistent good designed website is generated for general public that allows users to attain what they want as quickly as possible without spending much effort.

A consistent good design assists the user in recovering from errors.

LEADERS, TEAMS, ORGANISATIONS

Question No: 36 (Marks: 3) How can we include images in a web page using HTML and Java script?

Answer:

Image in HTML

Image in Javascript

Images in JavaScript can be manipulated in many ways using the built-in object Image.

Additional properties to HTML are hspace, vspace & lowsrc.

Example: It can be used by many handlers like, on Abort, on Load & on Error

Question No: 37 (Marks: 3) The event handler attribute consists of three parts. Write about each of them.

Answer:

The identifier of the event handler The equal sign

A string statement enclosed in double or single quotes.

Question No: 38 (Marks: 5)
What is a packet in the network environment? What kind of information does it contain?

Answer:

- Packet is data chopped up into pieces in a network environment.
- These packets contain information about which computer sent the data and where the data is going.
- If a packet runs into a problem during its trip, it can attempt to find another route. When all the packets get where they are going, the recipient computer puts them together again.

Question No: 39 (Marks: 5) Suppose we have a big project. Draw hierarchy of the people involved in the project?

Answer:

Please ignore small lines relating Sub Teams to subordinates due to shortage of time. ABCD etc are connected directly to Team Lead 1,2 & 3 accordingly.

Question No: 31 (Marks: 1) What is heuristic?

Common sense Lesson drawn from experience (Artificial) Intelligent Systems
SW programs or SW/HW systems designed to perform complex tasks employing strategies that mimic some aspect of human thought

or

- a commonsense rule (or set of rules) intended to increase the probability of solving some problem
- of or relating to or using a general formulation that serves to guide investigation

THE BEST LEADERS TEAMS, ORGANISATIONS

Question No: 32 (Marks: 1)
In programming, what is an object?

Object: A named collection of properties (data, state) & methods (instructions, behavior)

Question No: 33 (Marks: 2)

What is spreadsheet? List any two jobs that it can do. A spreadsheet is a grid that organizes data into columns and rows. Spreadsheets make it easy to display information, and people can insert formulas to work with the data.

Electronic replacement for ledgers Charts financial-forecasting

Question No: 34 (Marks: 2) In JavaScript, what is event handling? What are the two types of events?

Capturing events and responding to them
The system sends events to the program and the program responds to them as they arrive
Events can include things a user does - like clicking the mouse - or things that the system itself does - like updating the clock.

Question No: 35 (Marks: 3) Explain how many ways businesses monitor their employees?

- Systems are available that monitor almost every key stroke that an employee makes on a computer
- Systems are available that read and censor all incoming and outgoing eMail
- It is quite straight forward to monitor where you surf, and when

Question No: 36 (Marks: 3)
What is difference between Design and System Architecture?

A system architecture or systems architecture is the conceptual design that defines the <u>structure</u> and/or behavior of a system.

An architecture description is a formal description of a system, organized in a way that supports reasoning about the structural properties of the system

Designs it as an independent, selfcontained system

Question No: 37 (Marks: 3)

What are the Sub categories of Artificial Intelligence? Briefly explain any two.

Expert systems

Systems that, in some limited sense, can replace an expert **Robotics**

Automatic machines that perform various tasks that were previously done by humans

Example:

Pilot-less combat air planes

Decision Support Systems:

Interactive software designed to improve the decisionmaking capability of their users Utilize historical data, models to solve problems

IRIVA

Question No: 38 (Marks: 5)

How many ways are there to call a function in a program? Explain with example

Functions do not run automatically. When the page loads, each function waits quietly until it is told to run

Calling a Function From an Event Handler

An event handler is a command which calls a function when an event happens, such as the user clicking a button.

The command is written in the format on Event, where Event is the name for a specific action. Here are some common examples:

Calling a Function From Another Function

function doSomething() {

doSomethingElse(); // This line calls the next function
}

Question No: 39 (Marks: 5)

Elaborate the '+ ' operator and its constraints with the help of examples

The "+" String Operator

The "+" operator can be used to concatenate two strings title = "bhola" + "continental"

The value of the variable title becomes "bholacontinental"

Question No: 40 (Marks: 10)

Write a JavaScript program having two functions sum and mean.

The web page will ask the user to enter five values to be added.

After taking input it will calculate the sum and mean of those values by calling sum and mean functions.

www.virtualinspire.com

Question No: 41 (Marks: 10)

Define the following terms.

Object

A named collection of properties(data, state) & methods (instructions, behavior)

Event Handler

An event handler is a command which calls a function when an event happens, such as the user clicking a button

Local Variable

Declaring variables (using the var keyword) within a function, makes them local•They are available only within the function and hold no meaning outside of it

Scope of Variable

Defining the space in which a variable is effective is known as

defining the scope of a variable. A variable can be either local or global in scope

Array

An indexed list of elements

Question No: 31 (Marks: 1)

In programming, what is a loop?

In computer science a for loop is a programming language statement which allows code to be repeatedly executed. A for loop is classified as an iteration statement.

Question No: 32 (Marks: 1)

What are the other names of function? Any one. Routine, procedure, sub prograam

Question No: 33 (Marks: 2)

How JavaScript Arrays are heterogeneous?

Arrays are heterogeneous in java script because at the same time stimultanously they can hold elements of multiple data types

Question No: 34 (Marks: 2)

What is the database?

Data base is a collection of organized data in a proper way that computer can quickly search for any desired data item, its an easy way of allowing of manipulation of data, they are design in such a way that access to any desired data can be identified and reached quickly and easy, they are generally consist of collection of interrelated files

Question No: 35 (Marks: 3)

Differentiate between LAN and WAN with one example of each. Lan is a local area network where as wan is a wide area network Lan can be used in a specific areas with limited computers where as

wan can be used on computers shared by large distances For example lan can be used on pc s or an organization located in one building but wan can be used on large scales like banks all over or in any Large communication systems

Question No: 36 (Marks: 3)

What are Trojan Horses?

Trojen horses are a kind of cyber crime, they are v harmful to computer because they are stand alone programme and the look like what they are not like any thing amusing or not harmless like games...

Question No: 37 (Marks: 3)

Elaborate Rester Graphics with examples.

A raster graphics image, digital image, or bitmap, is a data file or structure representing a generally rectangular grid of pixels, or points of color, on a computer monitor, paper, or other display device.

To illustrate the matter further - here's the letter "J":

Look closely at it... Take a magnifying glass to it if you like. You see a "J", the computer sees something more like this, where '.' represents a zero and 'X' represents a one:

...X

...X

...X

...X

...X

...X

...X

X...X

X...X

.XXX.

Where you see a zero, the computer instructs its video hardware to

paint the current background color. A one calls for the current foreground color. Yes, it is actually a bit more complicated, but it all basically boils down to one bit or the other making a distinction between the colors of adjacent pixels, which together form an image.

Question No: 38 (Marks: 5)

What are the important properties, methods and event handlers of image object?

The primary use of the image object is to download an image into the cache before it is needed to display, image object can be used to create different kinds of animations or to display one of several images based on the desired requirement, in java script image object can be used to display the required pre loaded image.

Properties of image object is theight width before verage are

<u>Properties of image object is</u>: height, width, hspace, vspace, src, name border etc

Methods :none

Event handlers: on aboart, onload, onerror etc

Question No: 39 (Marks: 5)

Write the JavaScript code for the Function
SumOddNumbers(maxNumber) that can add non-negative odd
numbers up to maxNumber and return their sum.

Question No: 40 (Marks: 10)

Write a note on:

- Coding guidelines
- · Guidelines for developing short programs.
- Coding guidelines
- Always use semicolons to end statements
- Indent blocks of code (2 to 5 spaces)
- Identifiers
- Use the camel back scheme
- Variables: nouns
- Functions: verbs
- Comment Liberally
- Make them descriptive but concise

ŀ

Gudelines for developing short programs.

- · Read and understand the problem
- Do you have all the required data?
- · No: Get it
- Else assume it. State it explicitly
- · Do the design

Question No: 41 (Marks: 10)

write a note on each of the following:

- a. Vector or Object-Oriented Graphics:
- b. Bit-Mapped or Raster Graphics:

A:In Vector or object oriented graphic everything drawn is treated as object, objects retain their identity after they are drawon, these objects can later be moved, stretched, duplicated, deleted, etc. they are resolution independent and have relatively small file size, the examples are: swf, svg, wmf, ps

brass_ibrahim: Vector graphics is the use of geometrical primitives such as points, lines, curves, and shapes or polygon(s), which are all based on mathematical equations, to represent images in computer graphics.

brass_ibrahim: The term "vector graphics" is mainly used today in the context of two-dimensional computer graphics Virtually all modern 3D

rendering is done using extensions of 2D vector graphics techniques .Virtually all modern 3D rendering is done using extensions of 2D vector graphics techniques

B:Bit-Mapped or Raster Graphics:

Treats everything that is drawn as a bit-map

If an object is drawn on top of another, it is difficult to move just one of them while

leaving the other untouched

Changing the resolution often requires considerable touch-up work

Relatively large file size

Examples: gif, jpg, bmp

masood.tariq: Bit-Mapped or Raster Graphics:

Treats everything that is drawn as a bit-map

If an object is drawn on top of another, it is difficult to move just one

of them while

leaving the other untouched

Changing the resolution often requires considerable touch-up work

Relatively large file size

Examples: gif, jpg, bmp

LEADERS TEAMS, ORGANISATIONS

www.virtualinspire.com

28 objectives were from old papers out of 30.

What is Array?

Marks 2

what is computer prrofessional?

define onLoad and onUnload?

waht is time bomb?

Marks 2

what is bandwidth?

Marks 2
Marks 2

Marks 2

"while" loop is more preferable than "For" loop? Marks 3 sementic web and present web? Marks 3 can we replace a human doctor by Expert system? Marks 5 Difference Internt and intranet? Marks 5 ways of navigation Heuristics? Marks 5 event handling?

Define network organization and its advantages? Marks 10

Coding Guidline and guidlines for short programs? Marks 10

Dewelop a web page that displays six thumbnails images. A main image should be changed to a large version of thumbnail as soon as the mouse moves over the thumbnail. Write complete html and java script? Marks 10

characteristics of Internet?

Marks 10

LEADERS, TEAMS, ORGANISATIONS

Profile and responsibilities of Team Leader?

Marks 10

due to computer how many jobs are available and how many jobs are eliminated? Marks

Today was my CS101 Paper. The Subjective Quizzes are as under:

- 1. How many members are in operational team and what there key resposibilities
- 2. What is Computer Screen?
- 3. What are weaknesses of the web?

- 4. Characteristics of Internet (Any Five)?
- 5. Breifly describe

Telnet

VoIP

Instant Messaging

FTP

IP/TCP

- 6. Describe the organizational structure?
- 7. What is image process
- 8. Pixel?

Today I had CS 101 Paper. There were 41 questions. 30 objective and

11 descriptive. Few of the questions were:

3 attributes of event handler

Difference between Internet and Intranet

Function

Commonsense to avoid viruses and explain antivirus

TCP/IP

An attack on Yahoo servers

Spreadsheets

Codes for uploading file

Hierarchy in an organization

Team lead

COO

Developer

Businessess monitoring their employees

'+' operator

Image in Javascript

Question No: 31 (Marks: 1) What is the function of Network Interface Card? Question No: 32 (Marks: 1) In programming, what is a loop? Ans: In computer programming, a loop is a sequence of instructions that is continually repeated until a certain condition is reached. A loop is a fundamental programming idea that is commonly used in writing programs. Question No: 33 (Marks: 2) What is an intelligent system? Question No: 34 (Marks: 2) Why hub is used in networks? Ans: Network hubs are used to connect multiple workstations for routing through a single link to a server. In computer network systems, hubs, switches, repeaters, and routers are used when creating a network. Question No: 35 (Marks: 3) What are Trojan Horses? Question No: 36 (Marks: 3) Elaborate with examples Vector or Object Oriented graphics Question No: 37 (Marks: 3) How can you define a consistent web design? Why is it needed?

Ouestion No: 38 (Marks: 5) if s = "All is well that ends well" then write JavaScript code that use 'e 'as delimiter to split the given string and show output using java script statements. Question No: 39 (Marks: 5) What are the advantages of multimedia presentations? Write any five. Ans: 1. Great tool for effectively communicating ideas to an audience 2.Easy to make last minute changes 3. The undo feature encourages experimentation 4. More attractive; commanded more interest 5. May include animations, sound, video 6.Easy to catalog, store, and recall 7. Great tool for making presenter-free interactive material (e.g. selflearning tutorials) Question No: 40 (Marks: 10) Write down HTML and JavaScript code for the following requirements: www.virtualinspire.com Declare an Array with the identifier SUBJECT having length 5. Assign following values to the array elements: MIS, Java, Algorithms, Databases, C++ Show all values in reverse order. x = new array(5);x[0]="MIS";x[1]="Java";x[2]="Algorithms"; x[3]="Databases";

x[4]="C++"; x.reverse(); x.sort();
